Electronics

Electronics figure heavily into every-day life. TV sets, Calculators and computers are all electronic devices, and many machines have electronic components. In order for these to function, it is necessary to have a circuit. Electric current needs to know where to go and how to get there. This is what a circuit does. A circuit provides a pathway through which the charge travels, connecting the power source to the apparatus, and making everything work!

EDITOR'S NOTEBOOK

Dear Archie Readers,

Now that summer has officially started, you no doubt have your whole vacation planned out to the very last detail. Ha! Ha, ha! Ha, ha, ha! Well, just in case you do, you might not have time to earn some EXTRA MONEY. Do I have your attention? If I do, then think about this.

Whether you're a member of the Archie Club or not, Archie comics is prepared to pay out some extra moolah, IF we publish your letter on one of the Archie Club News pages. Here's all you have to do....

The subject must be "My Summer Vacation." Now that doesn't mean MY summer vacation, it means YOUR summer vacation. Get it? Share your plans and/or how you spent it. Did you go to camp? Did you have an "ugh" job or, "ech," attend summer school? Maybe you traveled or visited friends or relatives. Make your report interesting or try to be funny, like me. In any case, the best letters will be published and winners awarded cash prizes. Normally, we pay \$10.00 for First Prize winners. We'll up it to \$15.00! This applies to "My Summer Vacation" reports only. All entries must be postmarked no later than AUGUST 31, 1995.

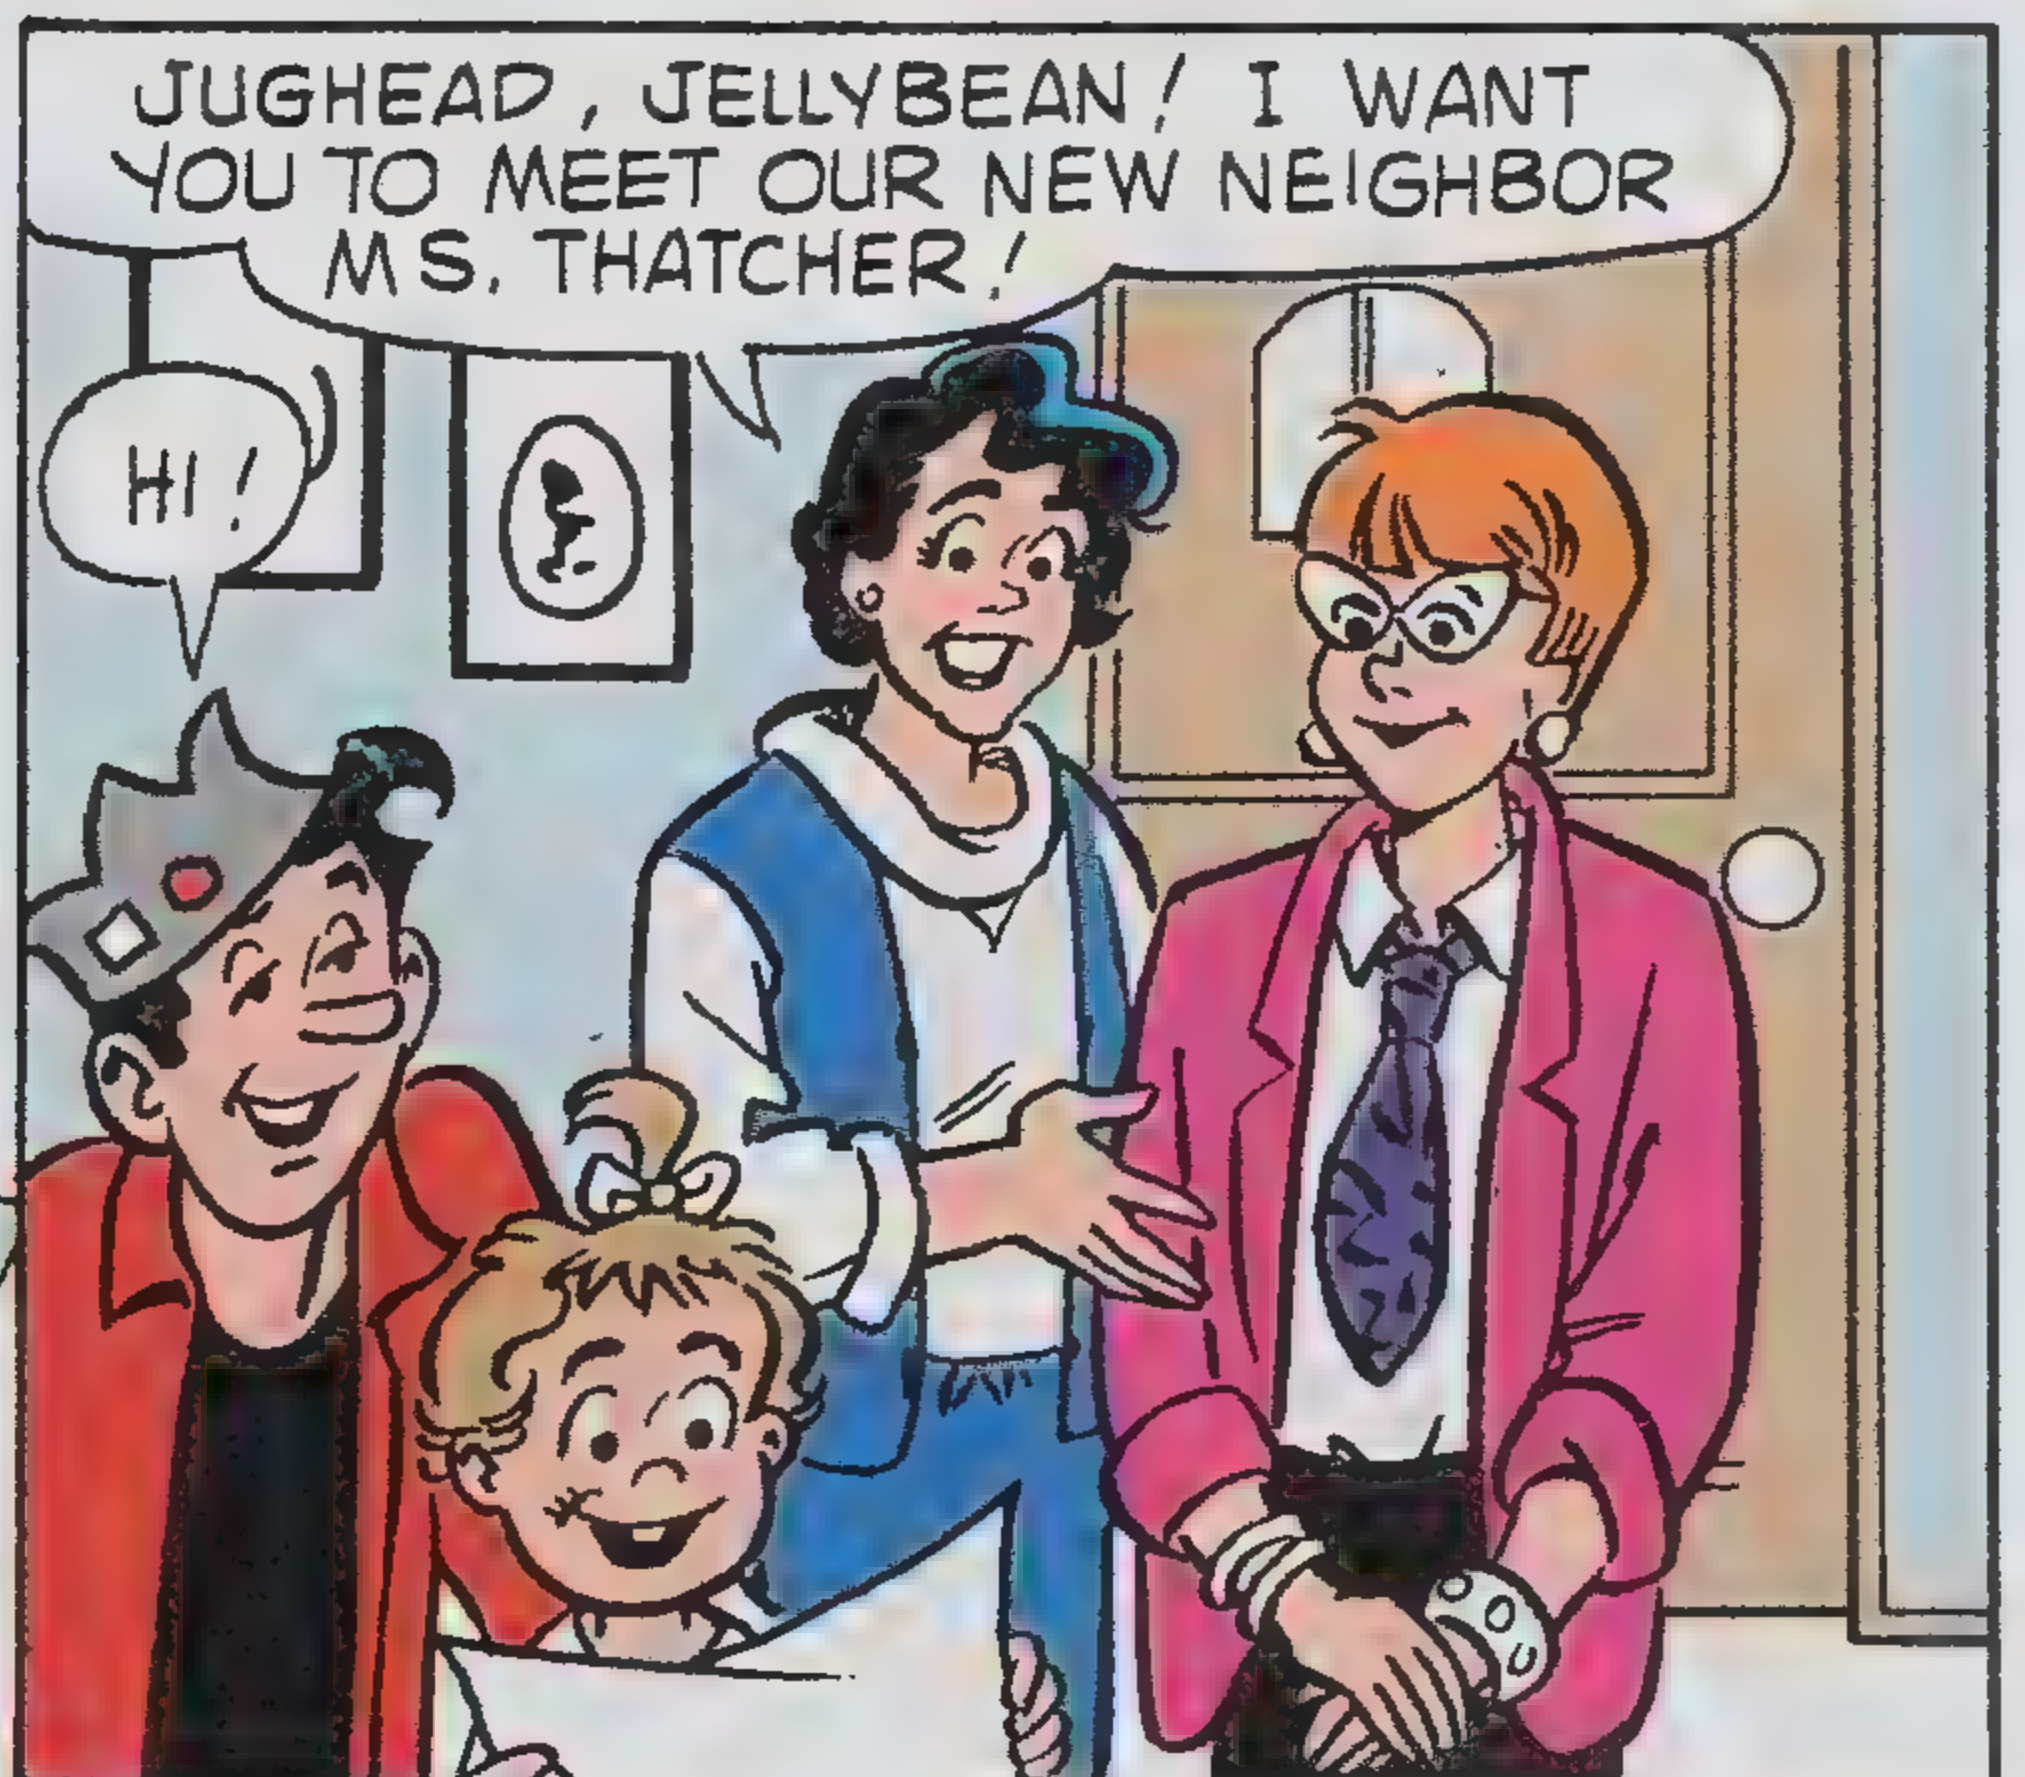

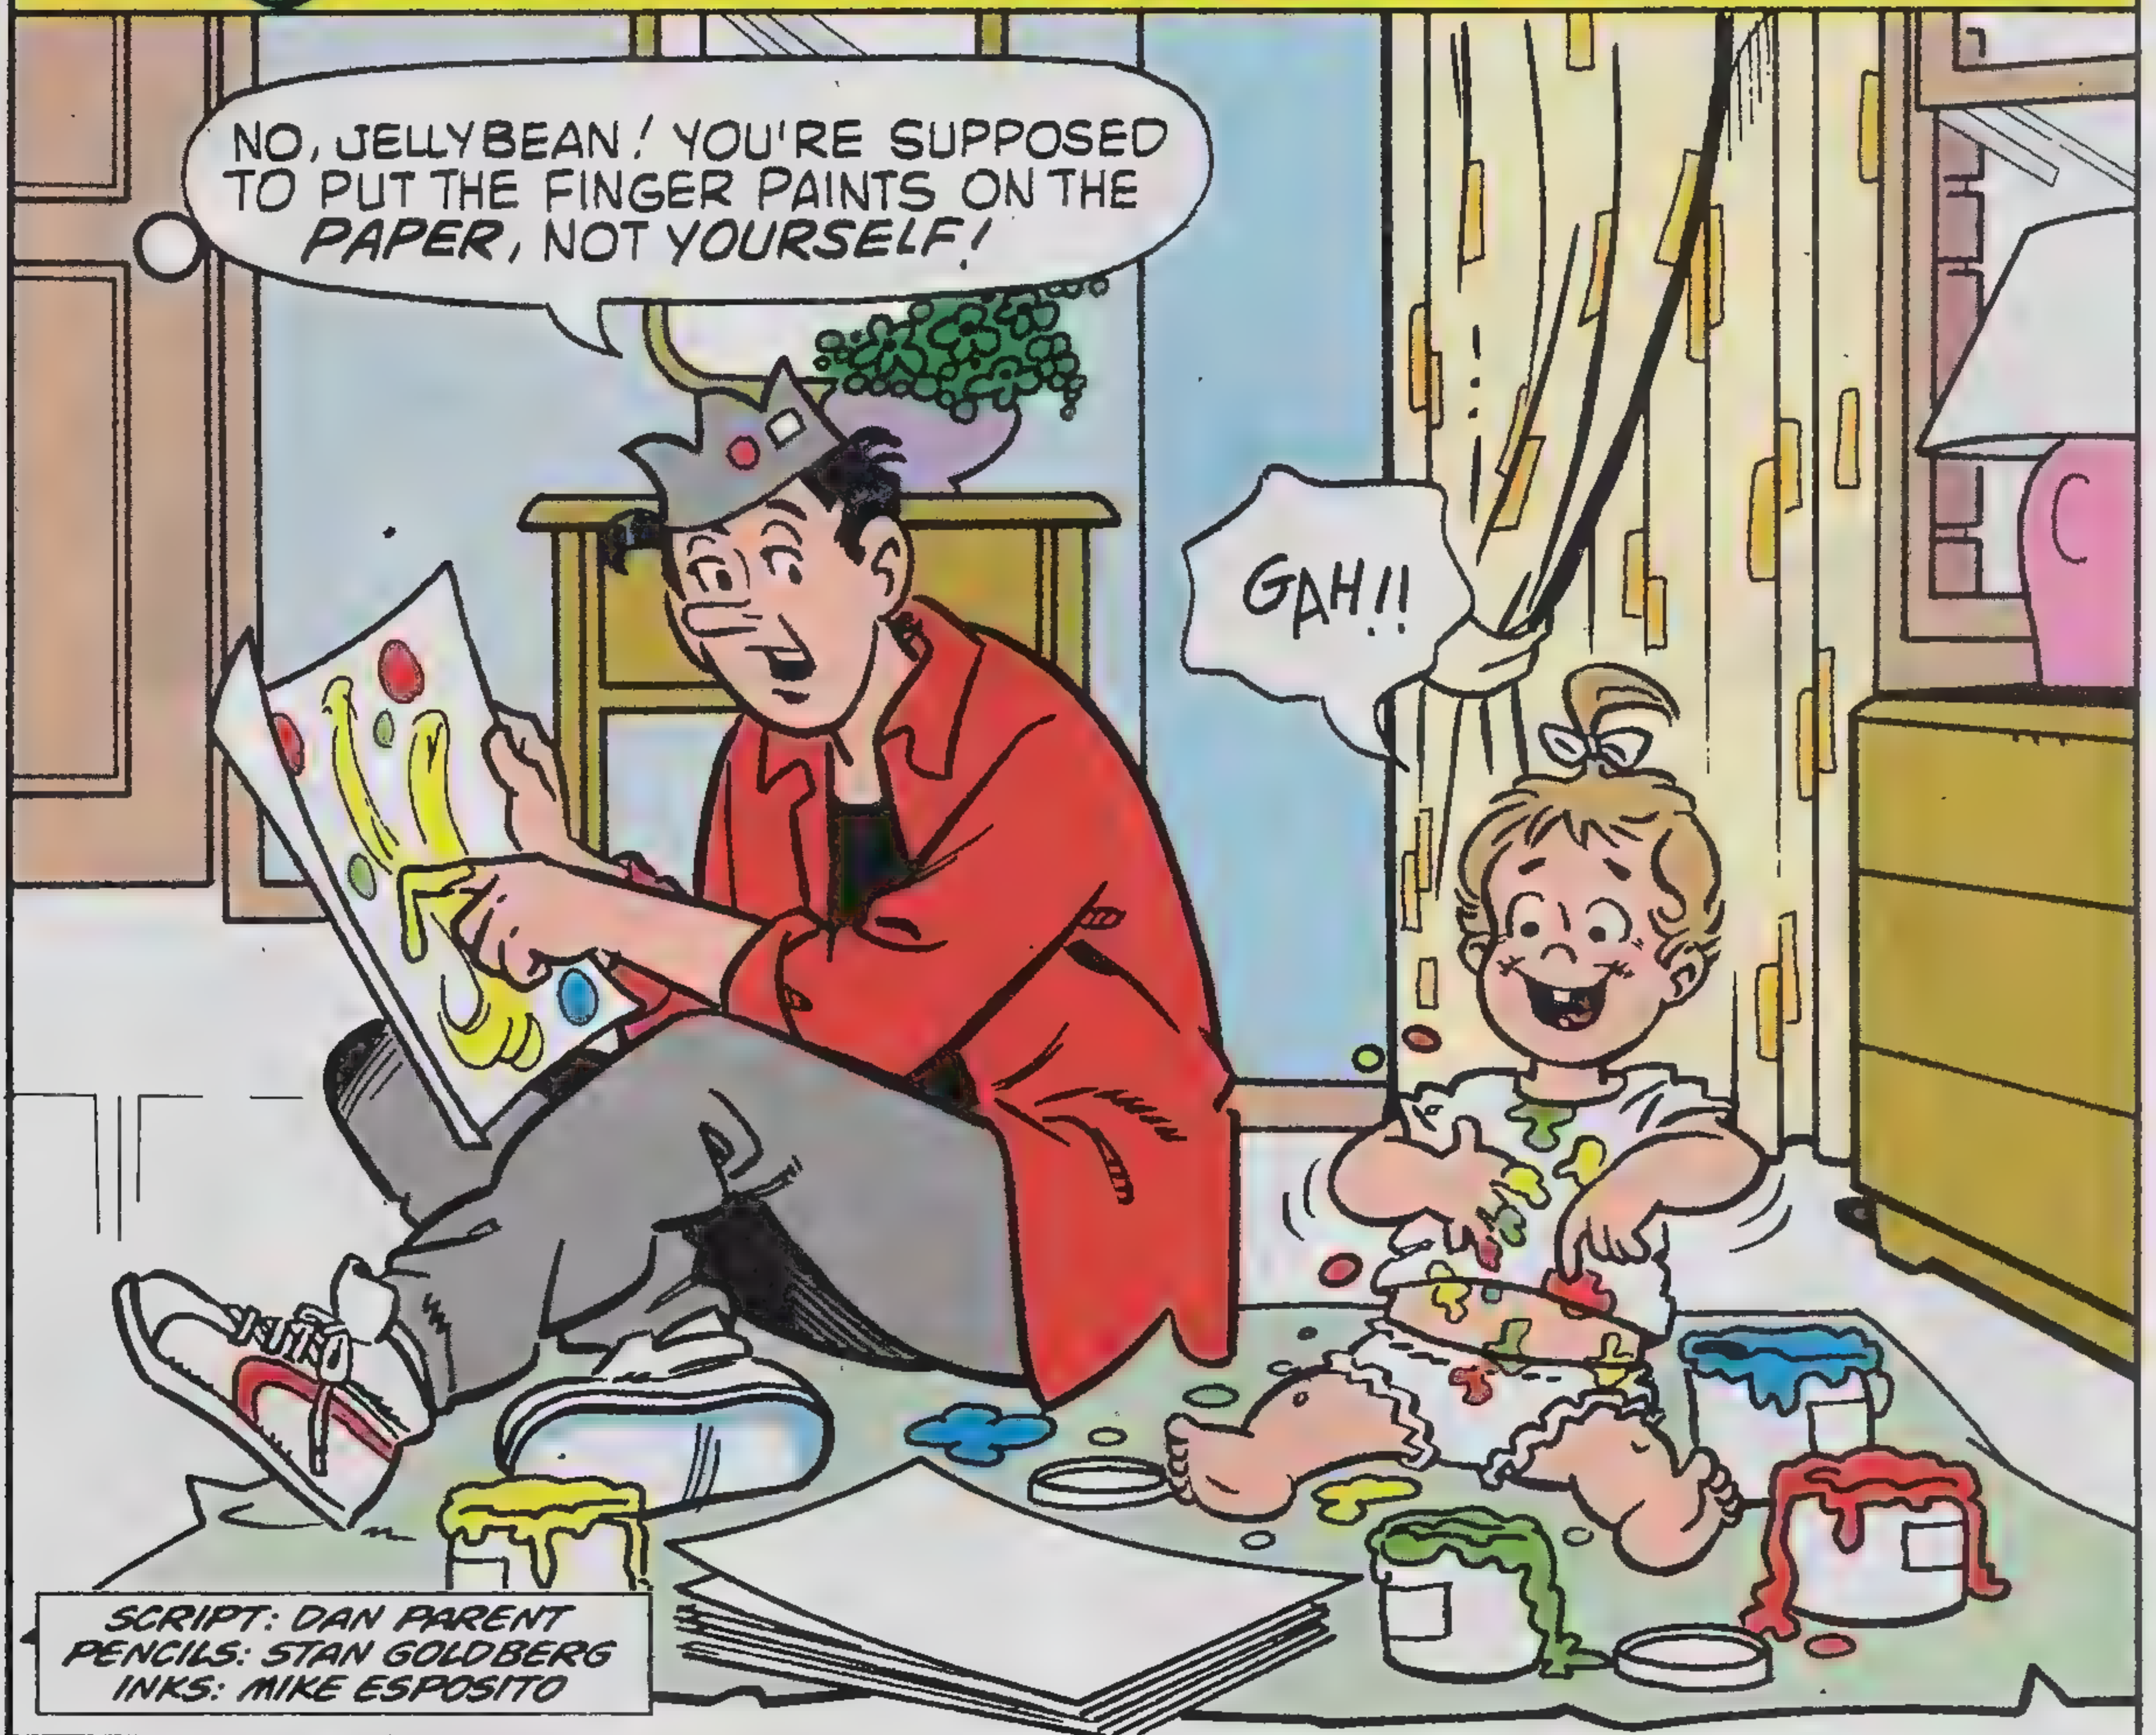

So take advantage of all that spare time you have this summer. Hey, fifteen bucks can go a long way if you invest it wisely. Like buying Archie Comics or pork bellies.

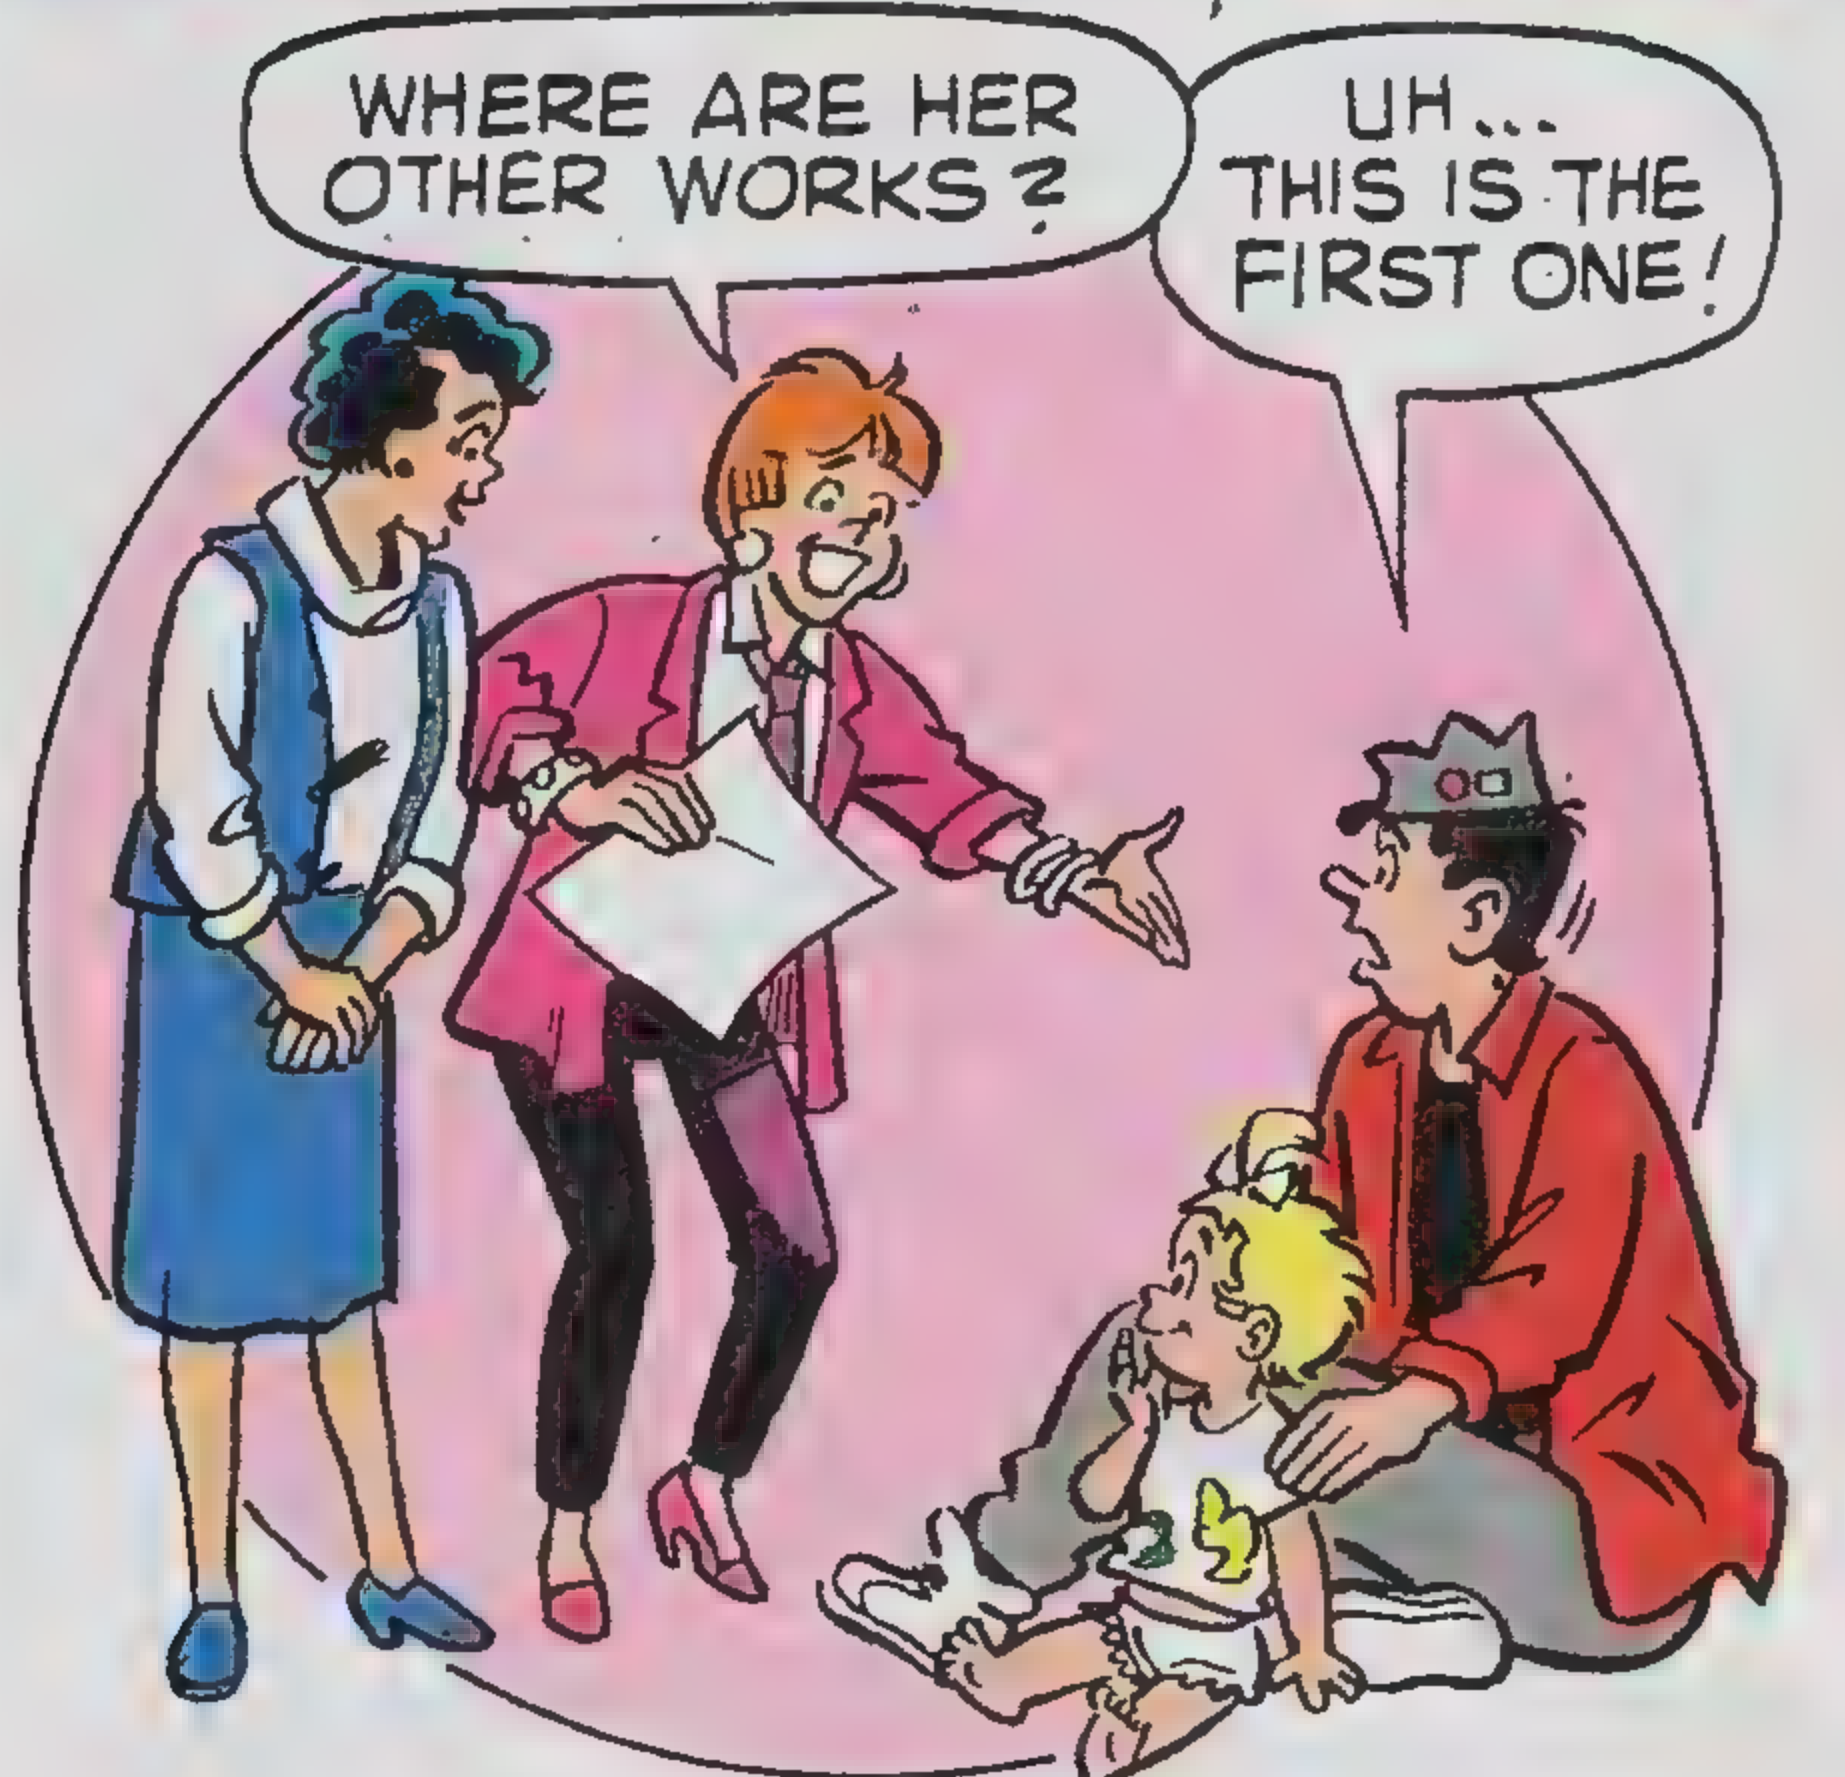

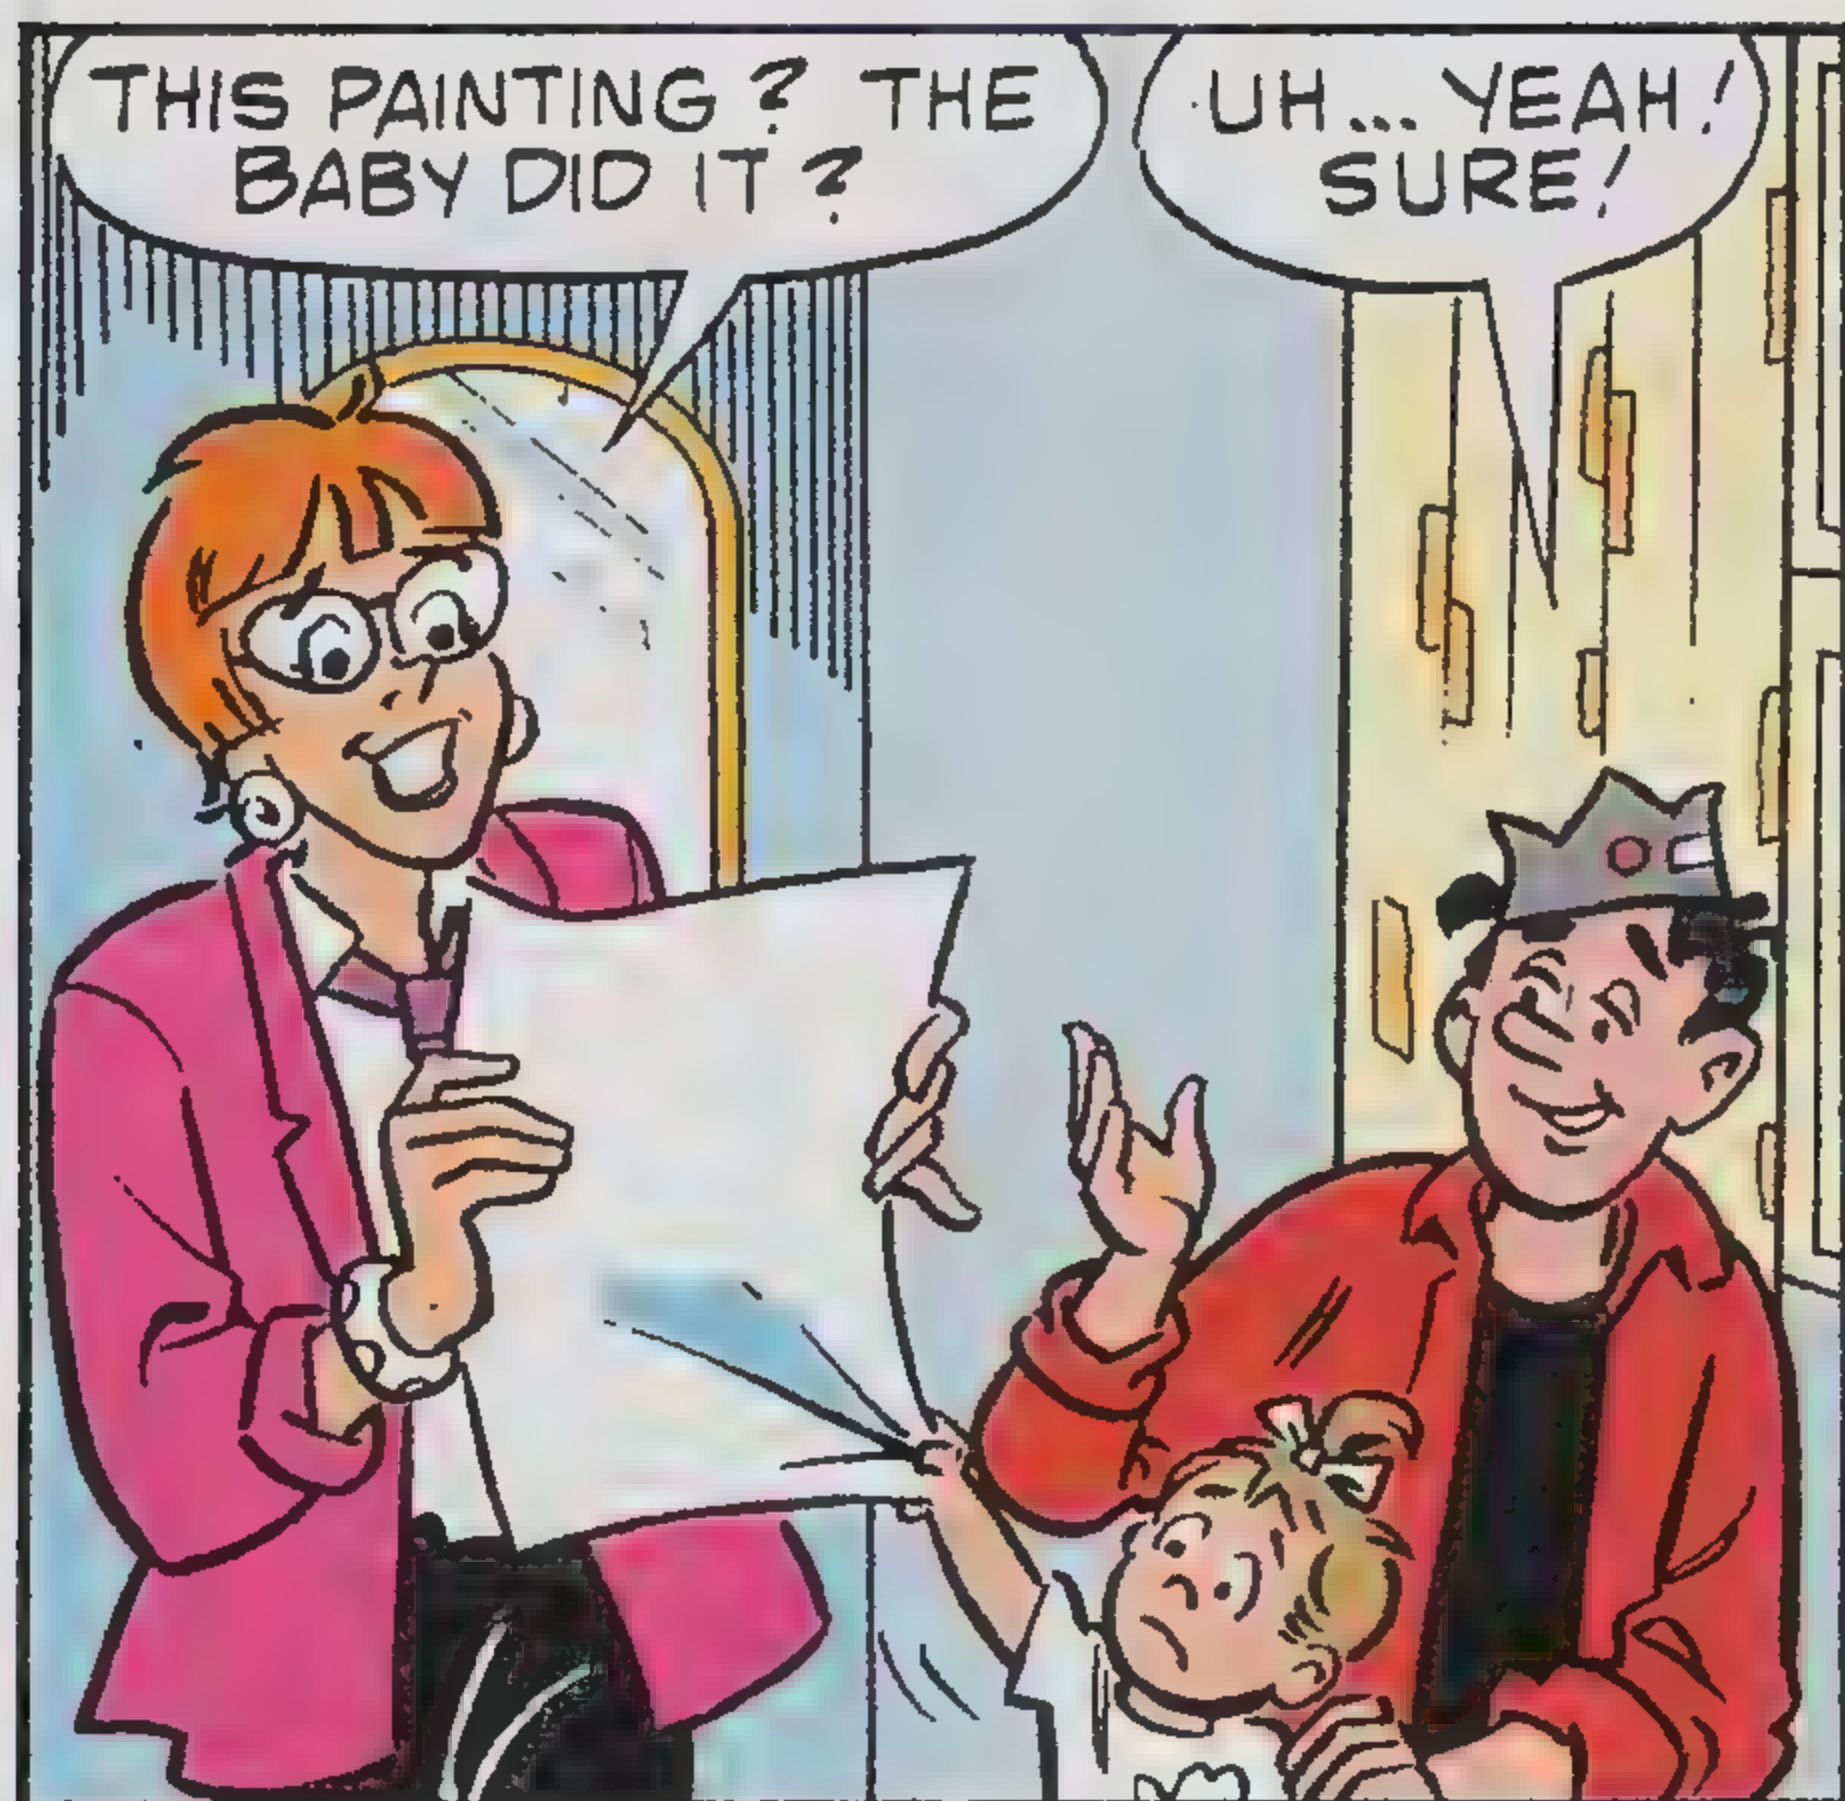

Just a reminder, July 27-30 is the San Diego Comic Convention. If you're in the neighborhood, stop by and say "Hi!"

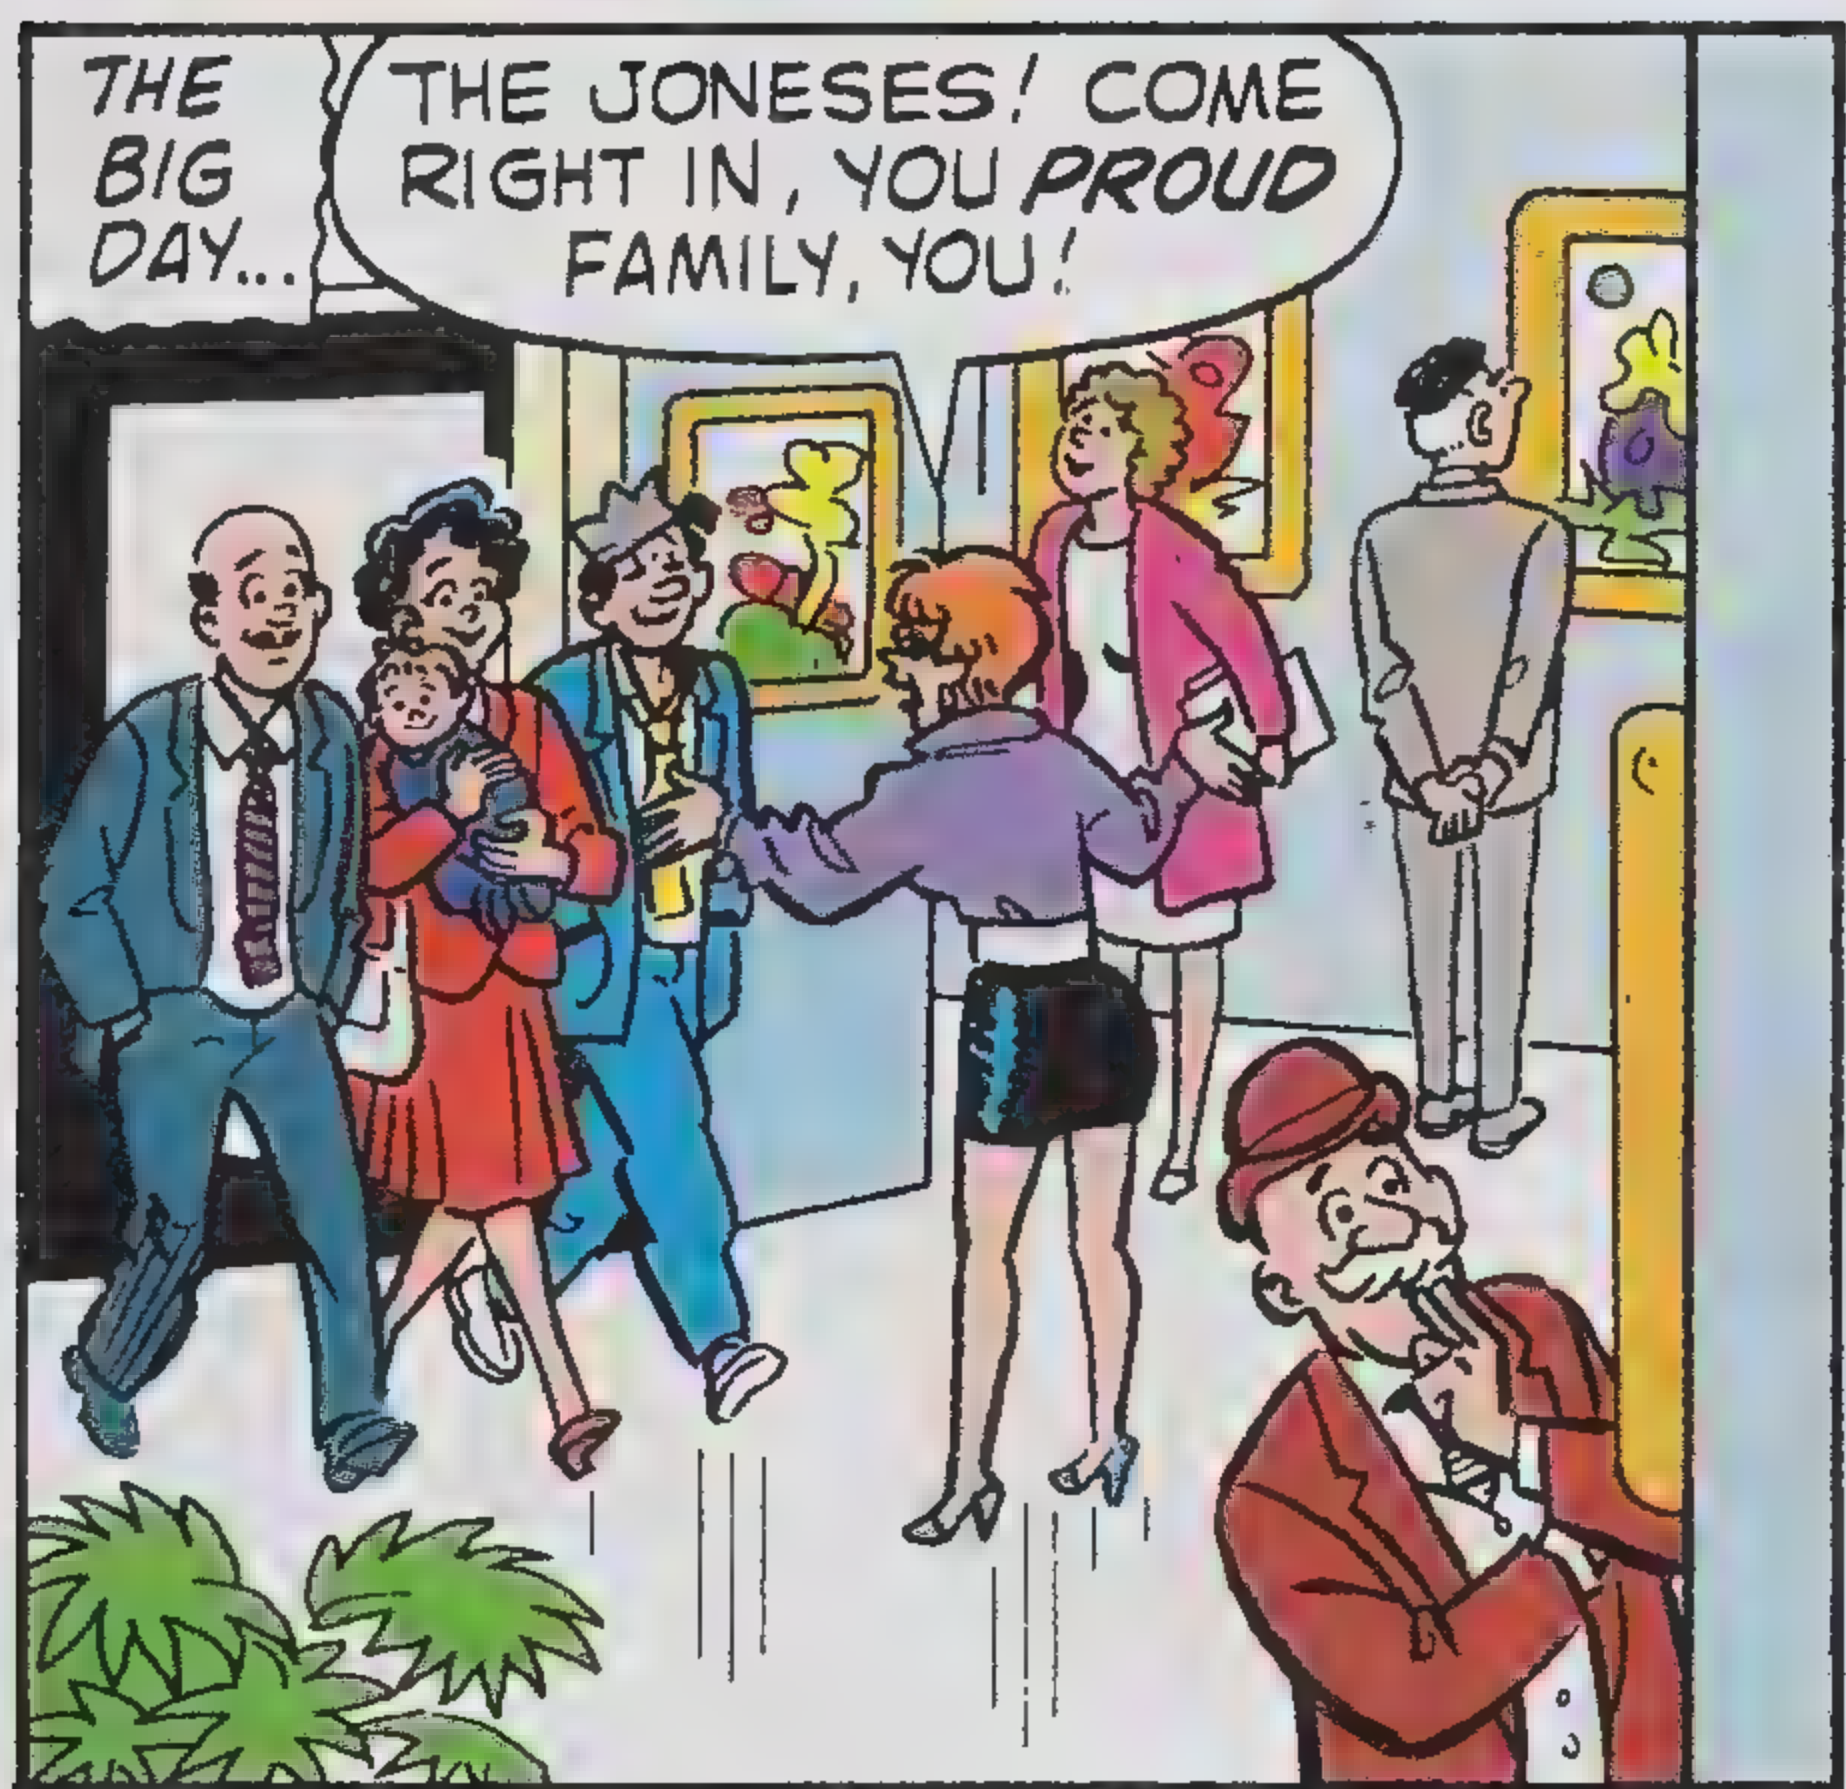

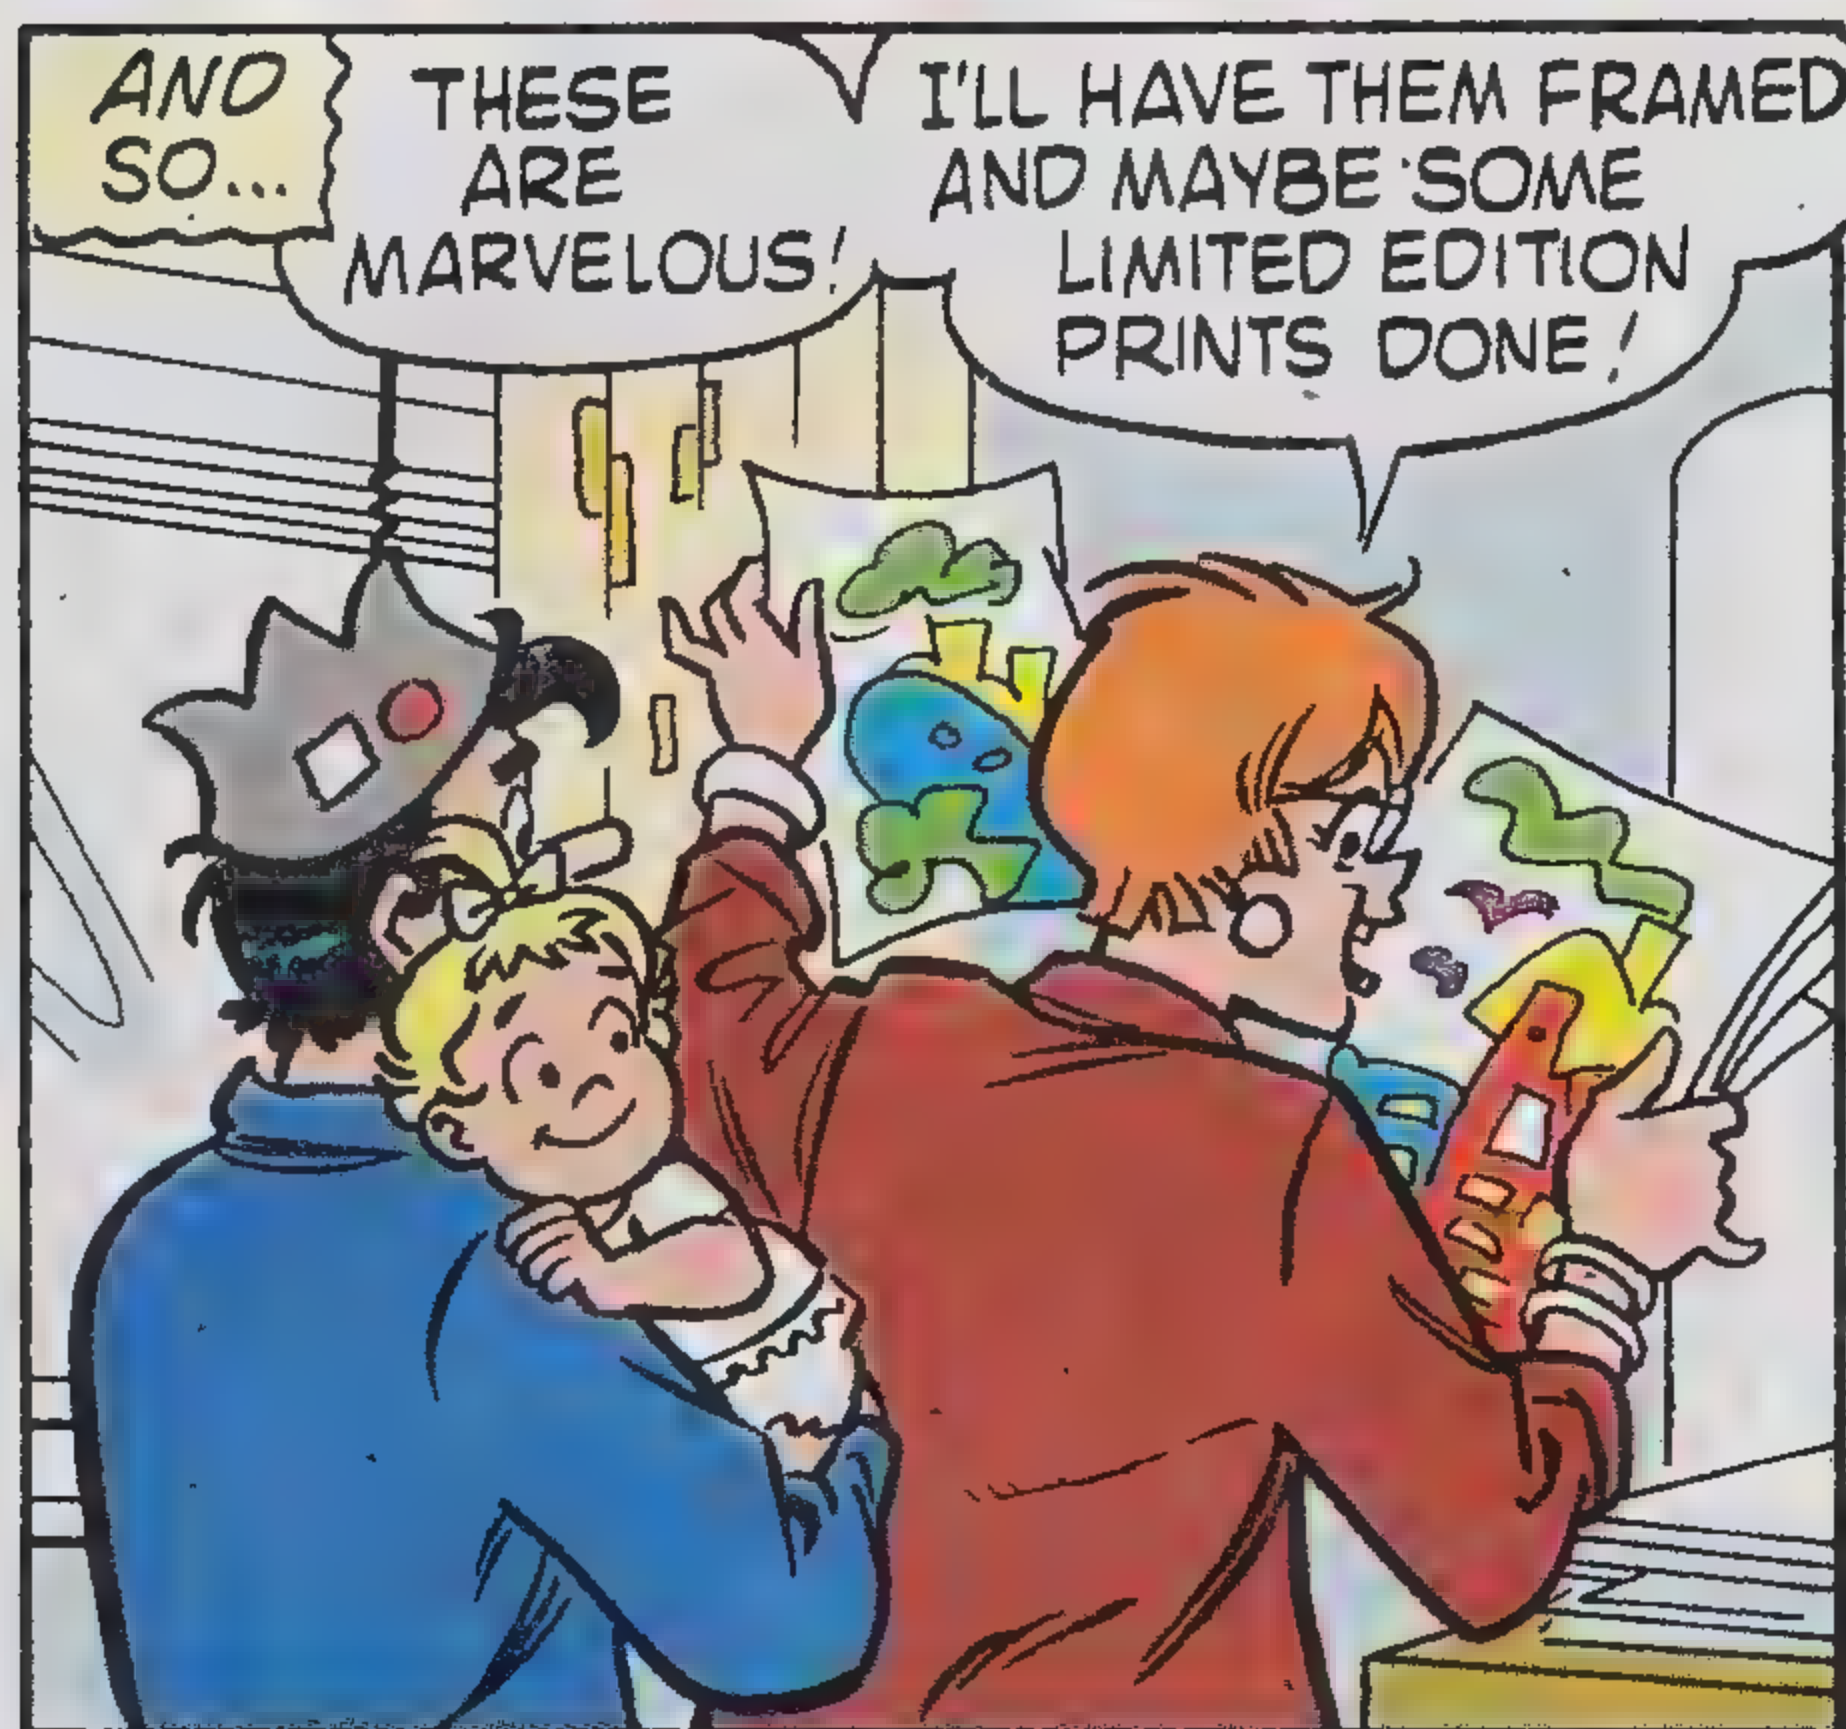

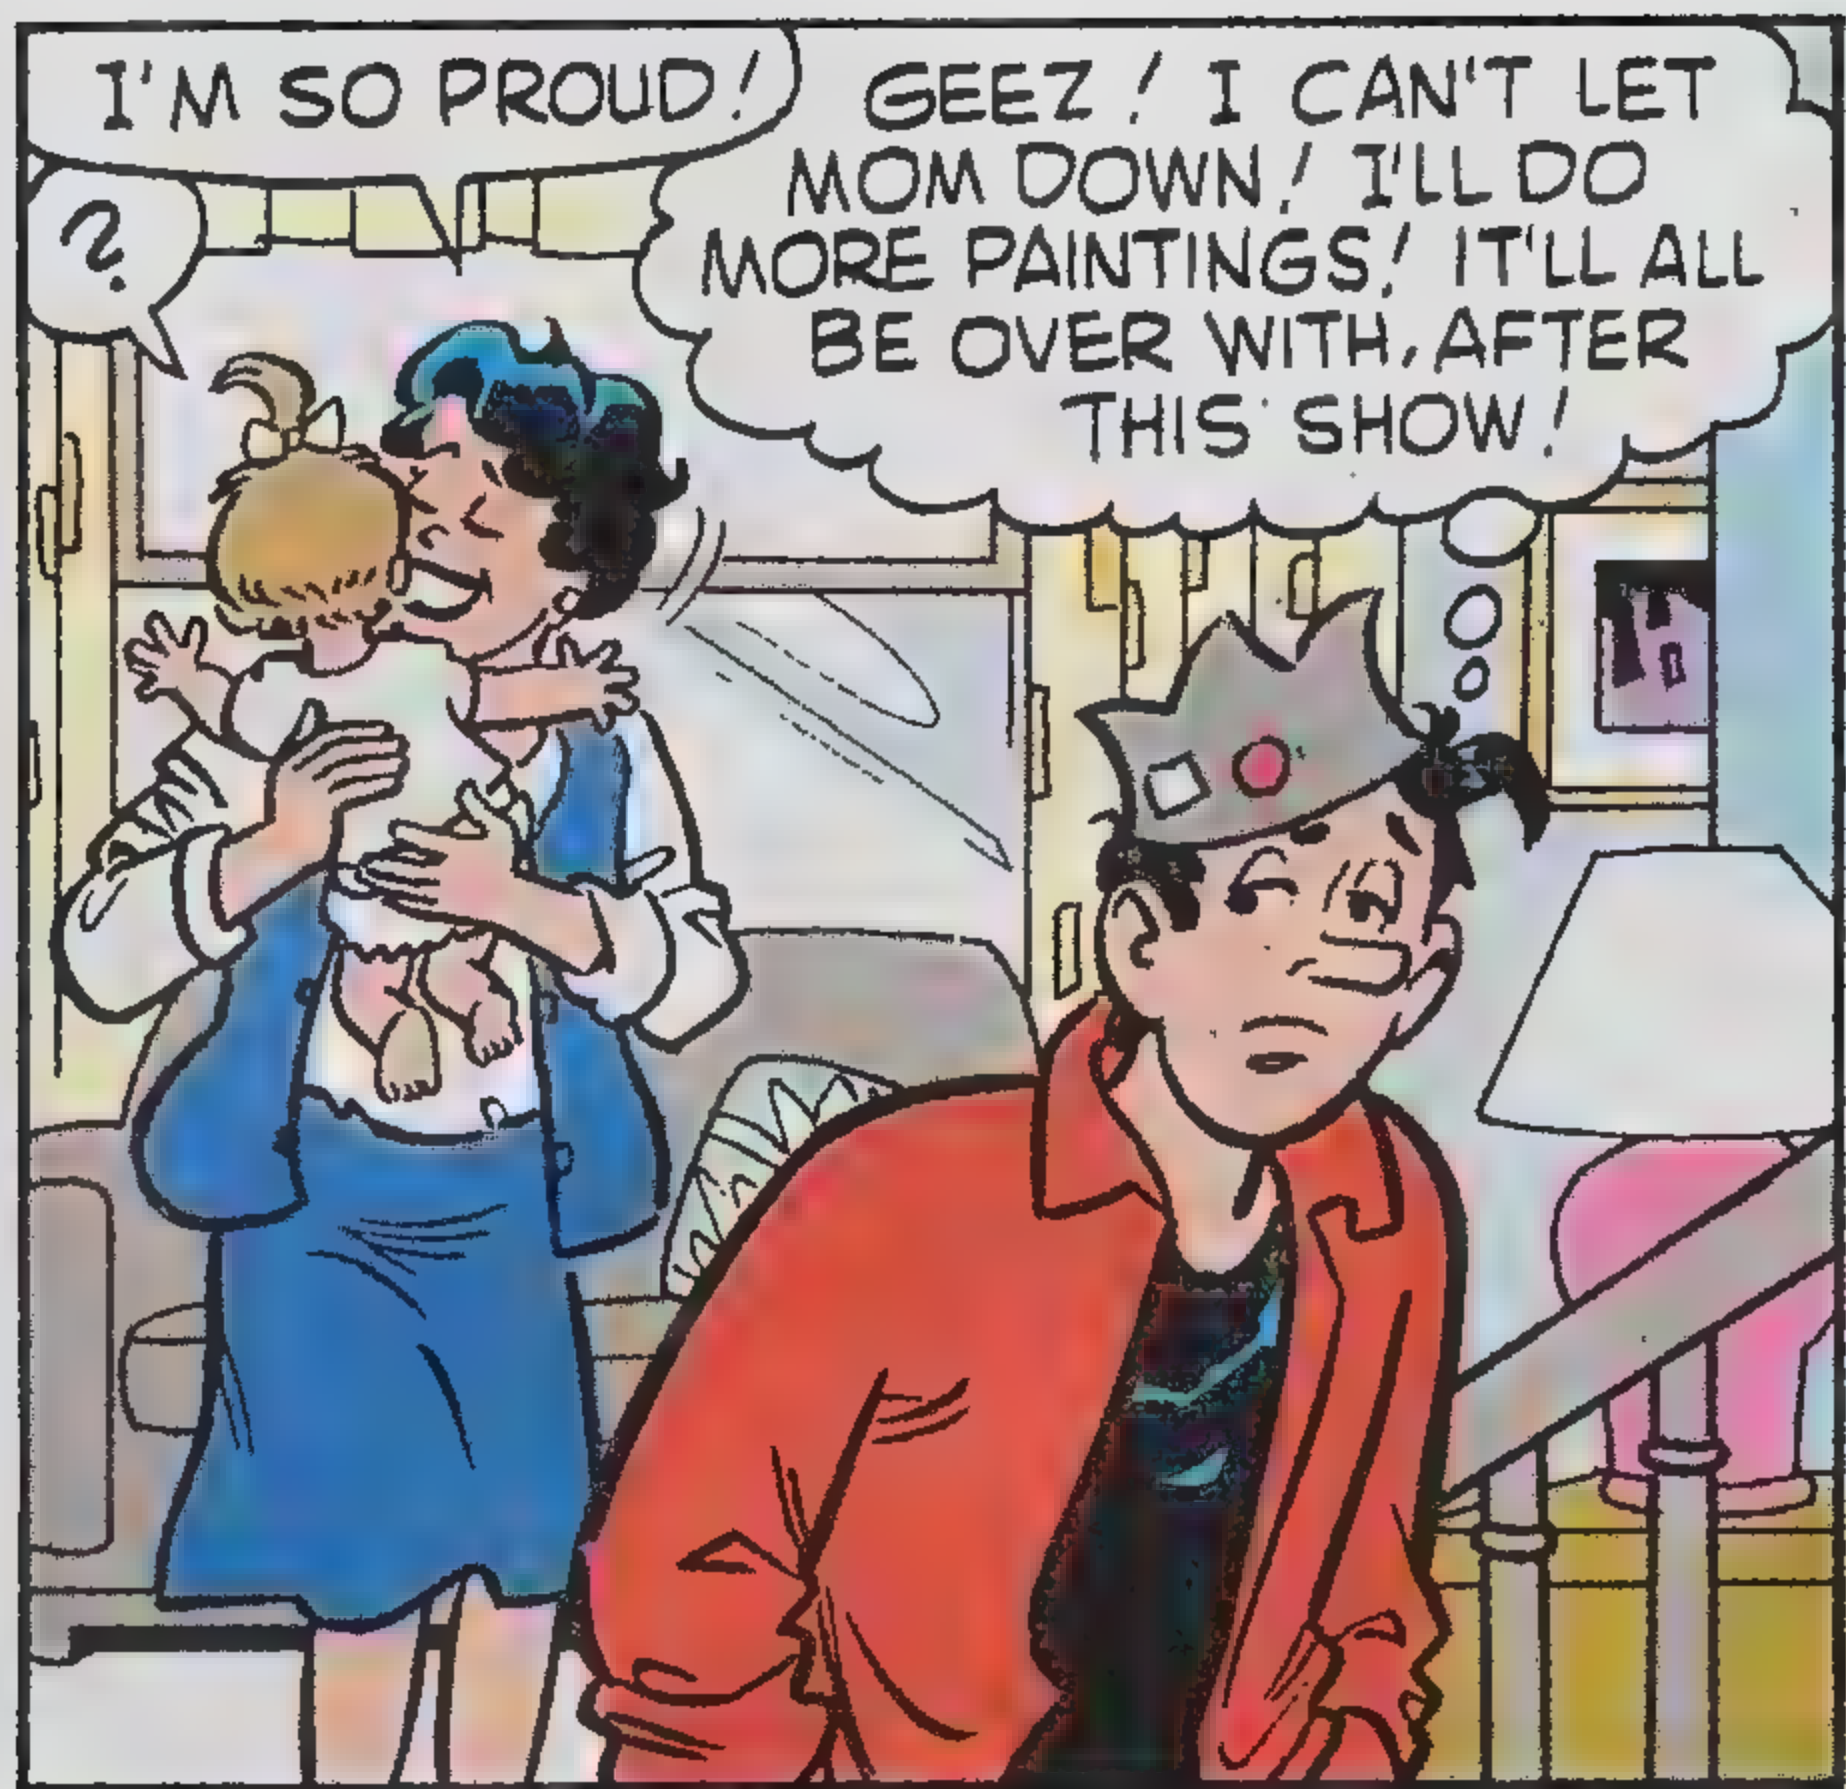

Archie will be there ... maybe even Betty & Veronica.
